# Satellite Symposium

The state-of-the-art  
lead extraction program

A. Curnis, Brescia, Italy

C. Kennergren, Göteborg, Sweden

## **Being successful: tools for a difficult case**

P. Defaye, Grenoble, France

## **Being prepared: the safety net around the procedure**

R. Carrillo, Miami, USA

## **Being connected: cooperation with referring centers**

V. Bärsch, Siegburg, Germany

This symposium provides insights on how a lead extraction program could be shaped today. It specifically shows how to be successful in a challenging case, using up-to-date tools in the right setting. It also looks at how to provide a safety net for optimal patient outcome and how to strengthen the necessary networking with referring hospitals and physicians.
